RED ELM CAFE DESIGN

INTRODUCTION
- So I am redesigning the Red Elm Cafe webpage to have the contact info and have the information about the cafe the owners and the cafe itself in one page, I plan to remove the Instagram and insert general images and just link the social media at the bottom and have the menu at the top. I plan to add 4 images since sometimes the instagram link can be disconnected as well.

USER INTERFACE
- Revise the image uploaded along with this report
- I wanted to move some images around, make the full feature and presentation of the cafee
- Have the contact information hours and the address to the left of the images and the tool bar at the top.

NAVIGAVTION STRUCTURE
- So the user would load the page to the home page then there would be another page with the order online information, this same ORDER ONLINE will be linked to ORDER HERE , THE address will open to google maps. There will be another page with the menu, and another page about Red Elm Cafe if the user wants to know more about the cafe. Social Media information will be linked at the bottom of the page for the user to checkout.
